JOIN THE ADVISORY COUNCIL

The American Registry for Internet Numbers (ARIN) is seeking individuals interested in joining its Advisory Council.

ARIN Policy Development

All policies governing the management of Internet number resources (IPv4, IPv6, and Autonomous System Numbers) in the ARIN region are developed by and for the ARIN community using the Policy Development Process.

Policy development is an open and transparent process that is coordinated by a team of fifteen community volunteers who serve on the Advisory Council (AC).

The Role of the Advisory Council

The Advisory Council helps facilitate communication within the community regarding proposed changes to Internet number resource policy, as well as helping guide proposals and policies through the Policy Development Process, and forwards consensus-based policies to the Board of Trustees for ratification.

The Advisory Council also serves in an advisory capacity to the Board of Trustees on Internet number resource policy and related matters.

Candidate Qualifications

- Professional experience in Internet number resource management or public policy
- Ethical integrity and accountability
- Awareness of the Internet ecosystem
- Regional diversity to reflect the needs of the broader ARIN community
- Commitment to open-minded collaboration to maintain responsible Internet stewardship

Benefits of Service

- Shape Internet policy and governance
- Build your global professional network
- Enhance your professional leadership credentials
- Support innovation and infrastructure development
- Promote inclusive, community-drive decision making
